EDDIE

--> Quoting Jim Garver to All <=

JG> I looked at these but was unsure how to mount it vertically to avoid
JG> the 20-30db cross polarization attenuation on most signals.
JG> I now use a 2 meter folded dipole with 1/2 wave coax balun fed into 75
JG> ohm CATV 3/4" hardline. This vertically mounted dipole way up in the
JG> tree seems to work very well on much higher frequencies too. It
JG> completely blows away the discones and 1/4 wave ground planes I have
JG> tried, also mounted high up. I hate discones!
JG> Channel Master used to make a scanner antenna that was some kind of
JG> crossed and drooped folded dipoles, similar to the old FM turnstile
JG> antennas. I had heard good things about this antenna but nothing
JG> lately.

... Catch the Blue Wave!
___ Blue Wave/QWK v2.12
